

## MOBILE GO BAG

### Description

The Go Bag helps you get your value-added products to your customer base in a simple and cost effective manner. The durable structure allows for easy handling of both dense and sensitive products by bagging and stitching a variety of commodities.

### Specifications

When bagging sand the Go Bag filled and sealed a 50kg bag in 30 seconds which results in approximately 120 - 200 bags per hour. When using 50kg bags, 6 - 10 ton will be filled per hour (depending on the operator speed).

### Static Data

#### Production Output

150—250 BAGS PER HOUR

\* Production output may vary from area to area and operating conditions. Should be used as a target estimate only.
